EDUCATION

Hutatma Rajguru Mahavidyalaya Rajgurunagar,Pune Jun 2023-Jul 2026

Bachelor of Business Administration in Computer Applications GPA 8.25/10

SKILLS

Python, Java, MySQL, Php, Html, Css, Canva

WORK EXPERIENCE

Business Development Executive / Tender & GEM Executive Dec 2024 – Present

- Managed Government e-Marketplace (GeM) bidding and tender submission processes for multiple organizations.
- Prepared technical and commercial bid documents, eligibility compliance documents, and tender quotations.
- Coordinated with clients and vendors for documentation, bid participation, and contract-related requirements.
- Monitored tender portals, identified relevant opportunities, and maintained bid submission records.
- Assisted in business development activities and government procurement processes.

PROJECTS

KGN Enterprises – Manpower Management System Nov 2024-25

- Built a full-stack manpower management platform for workforce hiring, deployment, and client management.
- Developed admin dashboard, job posting system, resume management, client testimonials, gallery, and contact management modules.
- Implemented role-based access control, SEO management, dynamic content administration, and database optimization.

SmartPresence – Face Recognition Attendance & Payroll Platform Jan 2025-26

- Developed an AI-powered attendance management system using Face Recognition, PHP, Python, OpenCV, and MySQL.
- Automated employee attendance tracking, wage muster generation, payroll-ready reports, and OTPbased organization/employee verification.

Integrated real-time face scanning, attendance logging, voice feedback, and HR management modules.

TenderIQ Pro – Automated GeM Tender Intelligence Platform | 2026

- Developed a Python-based desktop application using PySide6 and Playwright to automatically scan GeM manpower tenders and download bid documents.
- Implemented PDF data extraction, configurable eligibility filtering, duplicate prevention, SQLite-based scan history, and automated Excel report generation.
- Added headless automation, detailed logging, configurable rules, and an integrated update mechanism for efficient tender monitoring.

VisionPuzzle – AI Hand Gesture Puzzle Game | 2026

- Developed an interactive browser-based puzzle game using JavaScript, MediaPipe, and HTML5 Canvas with real-time hand tracking.
- Implemented gesture-based photo capture, hand-controlled puzzle interactions, multiple difficulty levels, timers, achievements, and performance tracking.
- Added webcam recording, photo gallery, themes, animations, and local storage for an engaging computer vision-based gaming experience.

FinVault – Digital Banking Simulation Platform | 2026

- Developed a full-stack banking simulation platform using PHP, MySQL, JavaScript, and AJAX, replicating authentication, transactions, loans, cards, KYC, and notifications.
- Implemented secure authentication with OTP verification, password hashing, CSRF protection, session management, login throttling, and audit logging.
- Built customer and admin dashboards with transaction processing, EMI calculation, PDF statements, analytics, notification workflows, and role-based management.

ACHIVEMENTS

- Developed multiple full-stack and AI-based projects using Python, PHP, MySQL, JavaScript, OpenCV, and MediaPipe.
- Developed TenderIQ Pro, an automated GeM tender scanning and eligibility analysis application.
- Built SmartPresence, an AI-powered face recognition attendance and payroll platform.
- Developed FinVault, a secure banking simulation platform with authentication, transactions, KYC, loans, cards, and audit logging.
- Managed GeM tender and bidding operations, including tender research, eligibility analysis, technical documentation, quotations, and submissions.
